

Font Styles:

The font-family property is used to specify different fonts for various elements, such as 'Titillium Web', 'Merriweather', and 'Noto Serif Display'.

font-size property is used to control the size of text in different sections.

font-weight property is used to set the font weight of various text elements.

Text Styles:

text-transform is applied to change text to uppercase in the .title and .subheading.

text-align is used to control the text alignment in different sections.

Background Styles:

background and linear-gradient are used to create gradient backgrounds for the body, header, .navbar, section.content, and footer.

Color Styles:

color is used to set the text color for various elements.

border and box-shadow properties are used for creating borders and shadows.

List Styles:

The .navbar list items are displayed inline, and each list item has a margin to separate them.

Links in the navbar have special styling, including color changes on hover and click.

The ol.table-of-contents is styled to create a numbered list.

Link Styles:

text-decoration is used to remove underlines from links.

opacity and transition properties are applied to links in the navbar to control opacity changes on hover and click.

Spacing Styles:

margin and padding properties are used for creating spacing between elements and within elements.

margin-top is used to control the space above h2 elements.

Image Styles:

max-width, height, and display properties are used to control the display and size of images within the .centered-photo class.

Other Styles:

text-decoration is used to remove underlines from links.

transition is used for smooth color transitions on links.

position and position:relative are used to control the position of the footer and social links within it.

For the Title (.title class):

@import

url('https://fonts.googleapis.com/css2?

family=Titillium+Web&display=swap');

Font Family: The title uses the 'Titillium Web' font, which is a sans-serif font.

Font Weight: The font weight is not explicitly specified, so it inherits the default font weight for the 'Titillium Web' font.

Font Size: The font size is set to 36px.

Text Transform: The text is transformed to uppercase.

For the Subheading (.subheading class):

@import

url('https://fonts.googleapis.com/css2?family=Titillium+Web&display=swap');

Font Family: The subheading also uses the 'Titillium Web' font, which is a sans-serif font.

Font Weight: The font weight is not explicitly specified, so it inherits the default font weight for the 'Titillium Web' font.

Font Size: The font size is set to 24px.

For the Navigation (.navbar a):

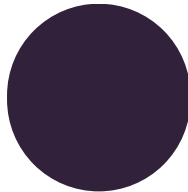

Font Family: The navigation links use the 'Noto Serif Display' font, which is a serif font.

Font Weight: The font weight for navigation links is set to 700.

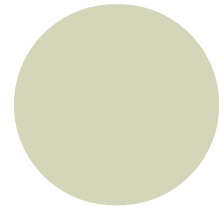

Font Size: The font size is set to 20px.

About Us

a types of media. I particularly enjoy writing and reading fanfiction. I'm a big fan of "Mercury the Pirate," and it's a significant source of inspiration for me. I also love coming up with alternate universe ideas, which allows me to explore different possibilities for characters and settings. My current favorite movie is "Shazam," which resonated with me, and it's a source of creative inspiration (hands you like here). The unique and diverse sounds in indie music always captivate me. I'm also a fan of alternative clothing styles and enjoy expressing myself through my fashion choices. In my creative writing, I occasionally delve into the realm of "one" writing. This style allows me to explore my emotions and express myself through my words. I often
